---

## EDUCATION

---

**The University of Adelaide**  
Bachelor of Software Engineering

February 2021 – November 2025 (Expected)

## WORK EXPERIENCE

---

Freelance Tutor

March 2021 – September 2023

I worked with university and high school students, teaching 1<sup>st</sup> and 2<sup>nd</sup> year computer science courses as well as high school maths. Through my comprehensive understanding and clear communication skills I helped my students improve their knowledge and academic performance.

## PROJECTS

---

### Linux Shell

January 2024

Developed a Linux Shell in C, adhering to the POSIX API standards. This shell emulates the user experience of interacting with the PC's filesystem, akin to using a terminal on a UNIX-type system. This project serves as a showcase of my knowledge in C and system-level understanding.

### Paxos Consensus Mechanism

September 2023

Implemented a robust Java-based Paxos consensus mechanism project that facilitates consensus among a network. This distributed algorithm seamlessly manages connect, prepare, accept, and consensus phases, implementing a reliable central server for effective communication. The project showcases my proficiency in Java and a deep understanding of distributed systems, emphasizing the critical role of fault tolerance and scalability.

## COMMUNITY INVOLVEMENT

---

### **Participant, CPC – Coding Competition**

November 2023 - Present

Contributed to a 10<sup>th</sup> place finish in the CPC Coding Competition, solving 8 out of 10 challenging Codeforces problems in a three-person team, showcasing adept problem-solving skills under pressure. Demonstrated versatility in addressing diverse challenges, contributing significantly to our team's success.

### **Participant, Lot 14 Space & Innovation Hackathon.**

July 2023

During this hackathon I collaborated with a team of six students to brainstorm, plan, research and assess feasibility of a solution in removing space debris. We presented a report of our proposed solution to a board on industry judges.

## LANGUAGES

---

**Skilled:** C++, Java, Python, C, Git

**Proficient:** HTML, MATLAB, Pinescript, Docker
